Client Success Stories

01

The client is an established private company with a rich legacy. An organization that was undergoing significant digital transformation and disruption.

The partnership with Frederickson:

The client organization was experiencing setbacks with their Chief Financial Officer (CFO) role as recent appointments to this position had been unsuccessful.

By leveraging flexibility, efficiency, and a deep understanding of both the organization's history and current challenges, Frederickson Partners was able to identify multiple candidates for this role rapidly. Within just a month after beginning the search, Frederickson presented a prime candidate, leading to an offer by the client just days after the candidate's introduction. By the end of that same week, the offer was accepted, making a remarkable turnaround time from placement agreement.

Key Successes:

- Continued trust and partnership with an existing client for a second key search
- Swift and efficient candidate sourcing, pinpointing the ideal CFO candidate in a time-sensitive situation.
- Leveraging deep industry and organizational understanding to tailor candidate sourcing.
- Restoring the client's confidence in the hiring process after past setbacks.
- Meeting the dynamic needs of a company undergoing digital transformation.
- Achieving a highly effective turnaround of just over one month from search agreement to successful placement of a new CFO.

02

The client is an innovative, fast-growing private equity-backed company in the technology space.

The partnership with Frederickson:

The client was looking to expand their team. However, they lacked a fully developed talent acquisition function and the vital skillsets required for recruiting and organizational growth. Their needs had also diversified across several functional areas of the business, triggering an urgent requirement to fill key new leadership roles, which the client was unable to execute on as they lacked specialized recruiters. They were resource-constrained and urgently needed critical positions filled to meet growth targets and client demands.

Through our comprehensive search approach and leveraging our experience across many roles, our team tapped into candidate pools the company had overlooked in the past. This also allowed us to source and present a more diverse slate of qualified candidates than the client had typically considered for these leadership positions.

The client quickly recognized Frederickson as a strategic partner who could provide valuable support across key functional areas beyond HR, including finance, operations, product, and service.

- Frederickson Partners was entrusted with multiple important leadership searches in addition to the CFO role, including leadership of HR, product and services areas.
- The Frederickson search team successfully placed a candidate for the Head of HR role who came from the hospitality industry. This leader brought a unique skill set that effectively translated to the client's company, despite their being in a technology space.
- The Chief Financial Officer was recruited from a media background and brought to the company valuable experience in high-growth environments.
